DETAILED ACTION

1. Election/Restriction

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 and 21-25, as drawn to a polynucleotide, a host cell, composition and method of making protein, classified in class 435, subclass 69.1.
- II. Claims 19-21, as drawn to antisense and a composition, classified in class 514, subclass 44.

B. The inventions are distinct, each from each other because of the following reasons:

Inventions I and II are independent and distinct, each from each other, because they are products which possess characteristic differences in structure and function and each has an independent utility that is distinct for each invention which cannot be exchanged. The polynucleotide of SEQ ID NO:1 is structurally and functionally distinct from a polynucleotide which is the antisense of SEQ ID NO:1. The function of the polynucleotide of SEQ ID NO:1 is to encode a polypeptide. The function of antisense is to inhibit protein formation by the sense polynucleotide. Antisense is not interchangeable with a complement of a polynucleotide.

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
